Experience

Technoly Current position

Front-end | React

- + Sole maintainer of the company's internal B2B service administration tool, **gaining hands-on experience across the full product lifecycle** and building **scalable code architecture**.
- + Led development of the company's ground transportation application; **mentored a junior teammate**, conducted code reviews, and contributed to project planning.
- + Recognized for strong knowledge of TypeScript through **self-directed learning**; collaborated across teams to resolve complex issues and share best practices.

Tech stack

- o TypeScript
- o React
- o MUI
- o SCSS
- o Emotion
- o TanStack
- o Web Comp

Infrastructure | Processes

- o Agile (scrum)
- o Jira
- o GitLab

All My Homes Financial restructuring

Front-end | Angular

- + Maintained a micro front end for the user "property basket" in an online housing marketplace.
- + Migrated three repositories from Angular 12 to 14, and transitioned from a **multi-repo to a architecture to a mono-repo structure**.
- + Implemented the migration to KeyCloak authentication for enhanced security measures.

Tech stack

- o TypeScript
- o Angular
- o Angular Mat
- o RxJs
- o Story book
- o SackStage
- o Jest
- o SCSS

Infrastructure | Processes

- o Agile (scrum)
- o Jira
- o GitLab (Nrwl Nx)

Open source

Maintainer | TanStack Form

Contributed core features including field and form listeners, custom meta, and submit meta enhancing extensibility and developer experience across **most major frontend frameworks**.

Maintainer | TanStack Devtools

Contributed initial documentation, as well as features such as split panel, and the theme redesign.

Contributor | MUI

Contributed the Slot and SlotProps migration for the SpeedDial, Rating, SnackBar and BackDrop.
