(distinction)
 - + Physics
(distinction)

Languages

- + English (native)
- + German (B1.1)

Experience

TanStack Maintainer

Form | AI | Devtools

- + **Maintainer of TanStack Form, TanStack AI, and TanStack Devtools**, responsible for issue triage, API design, bug fixes, and documentation across multiple high-traffic open-source projects.
- + **Designed and implemented TanStack Form Devtools end-to-end**, including UI, integration points, and overall developer experience, reaching ~50,000 weekly downloads; currently collaborating on the TanStack AI Devtools plugin to improve web accessibility.
- + **Integrated Ollama models into TanStack AI**, expanding the platform with support for 214 models spanning multiple model families and model types.
- + **Maintained libraries exceed 1.3M weekly downloads** and are used in production by companies including Apple, Google, Meta, and Amazon.

Tech stack		Infrastructure Processes
o TypeScript	o Tailwind	o PNPM
o React	o Standard Schema	o NRWL Nx
o SolidJs		o Github

Technoly Current position

Front-end | React

- + **Sole maintainer of the company's internal B2B administration platform**, owning the full product lifecycle and designing scalable, maintainable architecture.
- + **Led development of the company's transportation application**, mentoring a junior engineer, conducting code reviews, and contributing to technical planning and delivery.
- + **Recognized for TypeScript expertise** through self-directed learning, collaborating cross-functionally to resolve complex issues and establish best practices.

o TypeScript	o SCSS	o Web Comp	o Agile (scrum)
o React	o Emotion		o Jira
o MUI	o TanStack		o GitLab

All My Homes

Front-end | Angular

- + **Maintained a micro-frontend for the "property basket" feature** in an online housing marketplace, contributing bug fixes and incremental improvements in a production environment.
- + **Migrated three repositories from Angular 12 to 14**, helping transition from a multi-repo setup to a more efficient mono-repo architecture.
- + **Assisted with the migration to Keycloak authentication**, supporting improved security and standardized authentication flows.
